Saving is simple

To start saving in the plan immediately, check the 6% box on the form. To contribute more or less than 6%, write in the percentage you want to contribute each pay period. (You can contribute up to 40% of your earned base pay to the plan, up to the IRS limits.)

All-in-one investments

You will be automatically invested in the Vanguard Target Retirement Trust II with the target date closest to the year in which you will turn age 65. Although Vanguard Target Retirement Trusts simplify investing, you should still check your asset mix from time to time to ensure it is in line with your savings goals. There are also other investment options available in the plan in which you can elect to invest at any time.

Investments in Target Retirement Trusts are subject to the risks of their underlying funds. The year in the trust name refers to the approximate year (the target date) when an investor in the trust would retire and leave the workforce. The trust will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. An investment in a Target Retirement Trust is not guaranteed at any time, including on or after the target date. All investing is subject to risk, including the possible loss of the money you invest.
