Saving is simple

All-in-one investments

You will be automatically invested in the Vanguard Target Retirement Trust II with the target date closest to the year in which you will reach age 65. Although Vanguard Target Retirement Trusts simplify investing, you should still check your asset mix from time to time to ensure it is in line with your savings goals. There are also other investment options available in the plan in which you can elect to invest at any time.

Investments in Target Retirement Trusts are subject to the risks of their underlying funds. The year in the trust name refers to the approximate year (the target date) when an investor in the trust would retire and leave the workforce. Each trust will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. The Income Trust has a fixed investment allocation and is designed for investors who are already retired. An investment in a Target Retirement Trust is not guaranteed at any time, including on or after the target date. Whenever you invest, there’s a chance you could lose the money.
